House of Hope, Inc.
Since 1977
Dedicated to Helping People
Recovering from Alcoholism
and Chemical Dependency

In 1977, two men in recovery decided to build a house to help other men suffering from alcoholism. The House of Hope residential facility was built by volunteers with

a labor of love and donations from the community. Since that time, over 4,000 men have been treated here for alcoholism and drug addiction. Many other men and women have sought treatment through our outpatient program. The House of Hope residential facility is nestled on 10 acres with a homelike atmosphere in a rural setting outside of Grove, Oklahoma. The accommodations are comfortable, casual and the home cooking appeals to all appetites. Our clients are treated with respect and dignity by a compassionate caring staff. Special attention is given to each individual for their emotional, physical, mental, spiritual and social needs. These men are in an informal group setting with others that are affected with the same disease, and problems.

The support and camaraderie among clients and staff help create a lasting bond with family like ties. Individual and group therapy, with the introduction to a 12-Step Philosophy, enable a life free of alcohol and drugs. They are introduced to AA & NA by attending outside meetings. For thirty years, clients from Oklahoma and surrounding states have found hope and a new way of living from the education and counseling provided from our program. At House of Hope, we provide the highest quality of service at a reasonable rate.

Treatment is a discovery of ways to change irrational and self defeating attitudes and behaviors. Our clients are taught ways to develop and accept self responsibility for actions and behaviors. We believe that recovery is lifelong and active participation in a 12-Step program is greatly encouraged. We welcome anyone that has a desire for a better way of living. Here there is hope and help.

Residential Admission Criteria are:

- Assessed as being suitable for the individual according to ASAM, American Society for Addiction Medicine, standards
- Adult men age 18 or older
- Screening/Interview process for commitment to recovery
- Financial arrangements prior to admission
- Willingness and Desire to live a life free from addiction

HOUSE OF HOPE, INC. PURPOSE

The purpose of House of Hope, Inc. is to provide counseling and instruction to alcoholics and addicts in a 12-Step Philosophy and other approved mental health programs. We strive to provide a quality, compassionate, structured and supportive living environment. Our goal is for the individual to achieve long term lasting sobriety while enjoying a life of serenity, integrity, spirituality and purpose.

If you or someone you know is suffering from alcoholism or drug addiction and desires help, call for rate information and a list of our services or visit our website.
